ARC4108	건축설계6	ARCHITECTURAL DESIGN STUDIO 6	6	Design	4-2	필수
Class Room	Eng Bldg 1 A628		Schedule	Mon 6, 7, 8, 9, 10, 11, Thu 6, 7, 8, 9, 10, 11		
Course Offered	2nd semester of each academic year					
Instructor	Assigned Studio Professor		소속	Yonsei Department of Architecture		
Email 및 면담시간						
Course Level	4th Year 2nd Semester					
Course Description and Objectives	<p>This studio addresses urban housing blocks that increase internal urban density rather than expanding the city horizontally. It aims to maintain a balanced ratio of resident and floating populations and to support street-oriented lifestyles. The design target is a mid-to-low-rise, high-density mixed-use housing typology that fulfills urban functions while retaining zoning regulations.</p> <p>Students will design unit blocks with generous outdoor spaces, adequate sunlight, and vibrant commercial zones along the street level. The studio begins with imagining everyday life and explores how it manifests in residential plans, interior space, and urban public space. The lifestyle scenarios are linked to interior organization, building form, streetscape, and urban atmosphere. The design must accommodate diverse household types, support flexible floor plan arrangements, and anticipate future changes. It should integrate ground-floor neighborhood facilities, provide resting areas for pedestrians, and contribute to the cityscape with a distinctive facade and form.</p> <ul style="list-style-type: none"><li>Understand the relationship between architecture and the city, including facades and urban context</li><li>Propose urban strategies through site planning and building placement</li><li>Develop housing typologies based on lifestyle patterns and represent spatial configuration at an appropriate scale</li><li>Design facades considering sustainability and construction, and represent their ideas through detailed drawings and physical models</li></ul>					
학생수행평가기준) Student Performance Criteria (SPC)	<b>11: 연구기반 종합설계</b> Research based Intergrated Design Creative design proposals based on in-depth research and analysis, presented through various formats (drawings, reports, panels, etc.) Studio-X 특화 - 06: 대지와 외부공간 계획 Site Planning - 07: 안전설계 Safety Design - 10: 건축과 도시설계 Architecture and Urban Planning					
Prerequisite Course	ARCHITECTURAL DESIGN STUDIO 5					
Class Format	Lecture: 10%, Studio : 50%, Presentation : 20%, Discussion: 10%, Team Project: 10%					
Grading	Midterm: 20%, Final : 50%, Individual 10%, Team : 10%, Attendance: 10%

주	기간	수업내용				비고
1	2024-09-02 ~ 2024-09-08	Introduction reference projects				
2	2024-09-09 ~ 2024-09-15	reference projects reading				
3	2024-09-16 ~ 2024-09-22	reference projects reading				
4	2024-09-23 ~ 2024-09-29	Site survey reading				
5	2024-09-30 ~ 2024-10-06	The place urban concept				
6	2024-10-07 ~ 2024-10-13	The system building concept				
7	2024-10-14 ~ 2024-10-20	The system building organization				
8	2024-10-21 ~ 2024-10-27	The system floor plans / sections / elevations				
9	2024-10-28 ~ 2024-11-03	intermediate review				
10	2024-11-04 ~ 2024-11-10	The facade construction design				
11	2024-11-11~ 2024-11-17	The facade models / exterior images(draft)				
12	2024-11-18 ~ 2024-11-24	The character rooms / materials				
13	2024-11-25 ~ 2024-12-01	The character nuance models / interior images(draft)				
14	2024-12-02 ~ 2024-12-08	The atmosphere feeling of spaces				
15	2024-12-09 ~ 2024-12-15	Final review / Submission				
16	2024-12-16~ 2024-12-22	Final exam (no class)
